

Geo Links Sorting Mats & Pattern Strips

Use these printable pages with Geo Links (I purchased mine from Discount School Supply– www.discountchoolsupply.com). They come in a bucket of 500, but you can split your order with 4 other people (and each keep 100 links...more than enough!). Print all four pages on cardstock. Use the first two pages as sorting mats (one mat is for sorting by color, the other is for sorting by shape). The next two pages are strips and need to be cut out. I cut all the strips out and punched a hole; then I added a metal ring to hold the strips. These strips are used for pattern making (some by shape, others by color).
